OUR MISSION

The American Brain Foundation brings researchers and donors together to defeat brain disease.

OUR VISION

To cure brain disease.

LETTER FROM LEADERSHIP

Dear Friends,

Your support of the American Brain Foundation funded 20 early career neurologists and neuroscience professionals in 2015—each of whom received a research grant—to launch innovative research across a wide range of brain diseases. Thank you for your commitment to cure brain disease.

The American Brain Foundation takes a “whole brain” approach, funding research on many diseases of the brain and nervous system. We believe that a cure or discovery in one disease has the potential to cure many other diseases of the brain.

We are uniquely positioned to achieve our mission because of our exceptional research partnership with the American Academy of Neurology, the world's largest association serving neurologists and the neuroscience community. This partnership provides the Foundation access to the best and brightest minds to source high-reward research that cuts across various diseases of the brain.

Both of us bring close, personal experience with brain disease—the painful kind learned through helping a loved one through a critical illness. These experiences are shared with too many others—specifically 1 in 6 Americans is devastated by brain disease.

With your continued support we are dedicated to advancing the mission of the American Brain Foundation to bring researchers and donors together to defeat brain disease.

Warmly,

Kevin P. Goodno
Chair of the Board

Jane B. Ransom
Executive Director

Kevin P. Goodno, Chair

Jane B. Ransom, Executive Director

YEAR IN REVIEW

BIKE HELMET GIVEAWAY

Capitalizing on the concern about brain injury and concussion, the Foundation joined the American Academy of Neurology to hand out more than 1,000 bike helmets to the Twin Cities community. The popular event also raised nearly \$1,600 in donations to the Foundation.

STANDING STRONG

In November, the American Brain Foundation hosted its second annual “Standing Strong: An Evening Benefiting Brain Disease Research.” More than 150 attendees gathered at the TCF Bank Stadium Locker Room in Minneapolis—home to the University of Minnesota Gophers and the Minnesota Vikings. The evening featured a reception in the world-class stadium locker room, a rare behind-the-scenes tour of generally restricted areas of the stadium, remarks from former Vice President Walter Mondale, and a private musical performance by Ben Utecht, former NFL tight end, Super Bowl champion, and concussion sufferer. The event raised more than \$50,000 for brain disease research, doubling what was raised in 2014.

COMMITMENT TO CURES

The Foundation hosted its Commitment to Cures fundraiser for brain disease research at the American Academy of Neurology’s 67th Annual Meeting in Washington, DC. More than 150 attendees gathered to hear remarks from Julio Merida and his parents Sandra Reyna-Merida, MD, and Mario Merida, MD. Julio suffered from a stroke while in college and subsequently shared his moving story as part of the Foundation’s “FACES” campaign. The event raised more than \$55,000 for brain disease research by supporting the American Brain Foundation’s funding for Clinical Research Training Fellowships.

BRAIN SERIES ON PBS

The American Brain Foundation became a sponsoring partner of the six-part PBS television series “The Brain with Dr. David Eagleman,” which aired in October 2015. Eagleman is a neuroscientist, Guggenheim Fellow, and New York Times best-selling author. In the series, he employs an array of visual effects to take viewers on a journey inside the brain to demonstrate its complexities and how it works to give definition to who we are. By aligning with this show, the Foundation was able to connect with and educate more than 2.7 million households about the human brain.

Dr. David Eagleman sitting in his lab—the Laboratory for Perception and Action at the Baylor College of Medicine

RESEARCH

Through the support of our generous donors and partner organizations, the American Brain Foundation was able to provide \$1,780,333 in funding for research grants in 2015. This program is led by the American Academy of Neurology and identifies the best and brightest early career clinical neuroscientists to provide fellowships for their innovative research on diseases of the brain.

Thank you to the following organizations for partnering with the American Brain Foundation to provide funding for research grants in 2015.

- Allergan Foundation
- ALS Association
- American Academy of Neurology
- American Epilepsy Society
- American Heart Association/American Stroke Association
- Epilepsy Foundation
- Sanofi Genzyme
- National Multiple Sclerosis Society

SCIENTIFIC AWARDS

The Foundation provided support to the American Academy of Neurology Institute enabling it to confer the following awards:

SHEILA ESSEY AWARD: AN AWARD FOR ALS RESEARCH

This award recognizes an individual(s) who has made significant research contributions in the search for the cause, prevention of, and cure for amyotrophic lateral sclerosis (ALS). The criteria being used to determine the recipient include recent major scientific impact, long-term scientific impact, and overall impact to ALS.

Presented to:

Robert Bowser, PhD

Phoenix, AZ

Adriano Chio, MD, FAAN

Turin, Italy

POTAMKIN PRIZE FOR RESEARCH IN PICK'S, ALZHEIMER'S, AND RELATED DISEASES

This award recognizes major contributions to the understanding of the causes, prevention, treatment, and cure for Pick's, Alzheimer's, and related diseases.

Presented to:

Reisa Sperling, MD

Boston, MA

Peter Davis, PhD

New York, NY

LEADERSHIP AWARDS

The American Brain Foundation presented the following awards:

AMERICAN BRAIN FOUNDATION CHAIR AWARD

The Chair's award is presented by the Foundation's Board Chair to an individual who has demonstrated leadership in the fight to cure brain disease.

Presented to:

Ralph Józefowicz, MD, FAAN
Rochester, NY

PUBLIC LEADERSHIP IN NEUROLOGY AWARD

Presented in conjunction with the American Academy of Neurology.

Honoring an individual or group outside of the medical profession. Honorees are known for advancing public understanding and awareness of neurologic disease, being effective advocates for neuroscience research, and making significant contributions to improve patient care.

Presented to:

Walter F. Mondale
former Vice President of the United States.

Vice President Mondale was recognized for his decades-long commitment to raising awareness for brain health. Mondale lost both his wife and daughter to brain diseases. Mondale's daughter Eleanor was diagnosed with a brain tumor and later passed away at the age of 51. Within three years, he also lost his wife Joan, who had both Lewy Body dementia and Parkinson's disease.

GIFTS

In 2015, 2,219 donors supported the American Brain Foundation's initiatives with over 4,000 gifts. The Foundation raised \$2.8 million from grants and gifts. Contributors received encouragement from a \$3 million matching gift from an anonymous donor.

"We appreciate the support provided by the American Brain Foundation to accomplish these research goals."

–Wei Hu, MD, PhD
2015 Clinical Research Training Fellowship recipient

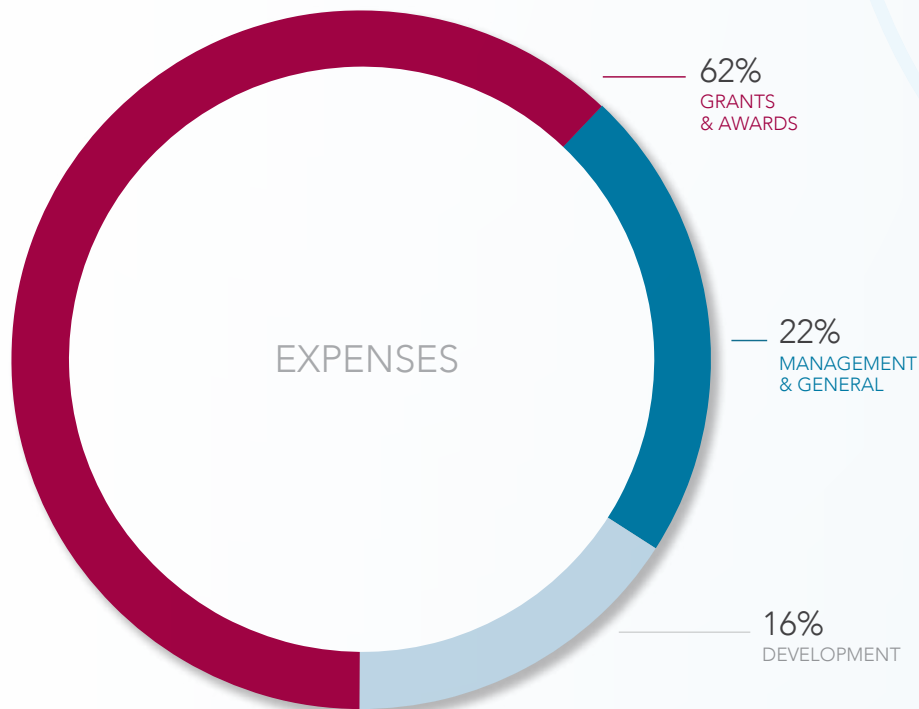

"The Clinical Research Training Fellowship provides essential protected time for investigators pursuing clinical research that is critical for making scientific discoveries important to improve health care outcomes."

–Leigh N. Sepeta, PhD
2015 Clinical Research Training Fellowship recipient

FINANCIAL HIGHLIGHTS

The information below summarizes the operating results of the American Brain Foundation for the year-ending December 31, 2015. A complete copy of the audited financial statements are available on our website at AmericanBrainFoundation.org
